

Tracking Special Barn Cat Adopters: Example

When an extra special barn cat adopter adopts, someone who provides exemplary care above and beyond average, expresses an interest in special needs cats or other critters, or may be a good fit for more challenging to place barn cats, this adopter is added to a spreadsheet.

This allows us to reach out to this pool of special candidates should we need to place a challenging cat with special needs or need to reach out about placing other barnyard critters.

A fictional example of this spreadsheet and the data within is shown below.
